

Atelier N° 1 : Master DSBD & IA

Pr. F. BENABBOU, Pr. A. DAIF

L'atelier N°1 a pour but de se familiariser avec un environnement virtuel, il comporte :

- L'installation VMware Workstation
- Création de 2 machines virtuelle et les connecter à un même réseau de différentes manières.

1. Installation de VMware Workstation

<https://my.vmware.com/fr/group/vmware/home>) ou virtualbox

a) Installation d'une machine virtuel (ex 2 ubuntu 14) à partir d'une image iso

New Virtual Machine Wizard

Memory for the Virtual Machine

How much memory would you like to use for this virtual machine?

Specify the amount of memory allocated to this virtual machine. The memory size must be a multiple of 4 MB.

64 GB -
32 GB -
16 GB -
8 GB -
4 GB -
2 GB -
1 GB -
512 MB -
256 MB -
128 MB -
64 MB -
32 MB -
16 MB -
8 MB -
4 MB -

Memory for this virtual machine: 1024 MB

Maximum recommended memory: 6312 MB

Recommended memory: 1024 MB

Guest OS recommended minimum: 512 MB

New Virtual Machine Wizard

Network Type

What type of network do you want to add?

Network connection

☐ Use bridged networking
Give the guest operating system direct access to an external Ethernet network. The guest must have its own IP address on the external network.

☐ Use network address translation (NAT)
Give the guest operating system access to the host computer's dial-up or external Ethernet network connection using the host's IP address.

☒ Use host-only networking
Connect the guest operating system to a private virtual network on the host computer.

☐ Do not use a network connection

New Virtual Machine Wizard

Select I/O Controller Types

Which SCSI controller type would you like to use?

I/O controller types

SCSI Controller:

☐ BusLogic (Not available for 64-bit guests)

☒ LSI Logic (Recommended)

☐ LSI Logic SAS

New Virtual Machine Wizard

Select a Disk Type

What kind of disk do you want to create?

Virtual disk type

☐ IDE

☒ SCSI (Recommended)

☐ SATA

Help < Back Next > Cancel

New Virtual Machine Wizard

Select a Disk

Which disk do you want to use?

Disk

☒ Create a new virtual disk
A virtual disk is composed of one or more files on the host file system, which will appear as a single hard disk to the guest operating system. Virtual disks can easily be copied or moved on the same host or between hosts.

☐ Use an existing virtual disk
Choose this option to reuse a previously configured disk.

☐ Use a physical disk (for advanced users)
Choose this option to give the virtual machine direct access to a local hard disk.

New Virtual Machine Wizard

Specify Disk Capacity

How large do you want this disk to be?

Maximum disk size (GB): 20.0

Recommended size for Ubuntu 64-bit: 20 GB

☐ Allocate all disk space now.
Allocating the full capacity can enhance performance but requires all of the physical disk space to be available right now. If you do not allocate all the space now, the virtual disk starts small and grows as you add data to it.

☒ Store virtual disk as a single file

☐ Split virtual disk into multiple files
Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

2. Configuration Réseau

a) Avec VirtualBox

b) Avec VMware Workstation

c) Configurations possibles

3 cas importants de configuration :

- NAT : ce mode permet de partager la connexion internet du Host

- Accès par pont : ce mode permet de connecter votre machine à Internet

- Réseau interne

- Test avec PING :
